WATER SUPPLY

With the exception of a few farms and cottages the district draws its water from the mains of the Durham County Water Board.

Speaking generally, the supply has been satisfactory.

Isolated farms and cottages not connected with main water supply.

The undermentioned farms receive their water supply from a spring situated near Weather Hill. The water is first pumped to a collecting tank and then piped to the farms :—

1. Baal Hill Farm.
2. West Brandon Farm.
3. East Brandon Farm.
4. Standalone Farm.

SCHEDULE SHOWING SOURCE OF WATER SUPPLY TO OTHER
FARMS AND ISOLATED COTTAGES IN THE DISTRICT.

Address	Source of Supply	Remarks
Hill House Farm and Cottages.	Spring	1. Near Houses, and used for drinking. 2. Spring some distance away, used for domestic purposes. There are occasions when the supply has failed and water has to be led.
Langley Old Cottages	..	Good quality and quantity.
Johnson's Farm,
Brandon
Stobb House Farm
Hareholm Farm
Ragpath Cottage
Heslet Farm	Laid into Farm house. Good quality. Supply fails on occasions.
Pit House Cottages ...	Upland	Water upland, surface, collected in storage tank and piped to these four cottages. Supply fails occasionally and water is led by the National Coal Board.

SANITARY ACCOMMODATION

There are still 1,778 houses in the area, which have sanitary accommodation of the conservancy type, but the majority of these houses are old, and will no doubt be dealt with under the Housing Acts as clearance areas within the next three to twelve years and it would be uneconomical to include these in a scheme of conversion. On the other hand there are included in this number many houses with an estimated life of 15 to 35 years, and undoubtedly these are the properties which should be considered for inclusion in any future conversion scheme.

Work on a number of conversions, commenced in 1951 was completed in 1952 and the total number of conversions completed is tabulated below.

North Ward	45
South Ward	2
East Ward	13
West Ward	32
Centre Ward	15
				<hr/>
				107
				<hr/>

The number of sanitary conveniences in the area at the end of 1952 was as follows.

Water Closets	4,561
Ash Closets	1,744
Ash Pit Privies	34
				<hr/>
Total	6,339
				<hr/>

SEWERAGE AND SEWAGE DISPOSAL

Negotiations are still in progress with the appropriate Government Departments and other interested bodies in connection with possible grants, approvals, etc., for the comprehensive Deerness Valley Sewerage Scheme.

W.C. CONVERSIONS

During the year, 47 Conversions were carried out at Harvey Street, New Brancepeth, 13 at North Brancepeth and Jones Terrace, Langley Moor, and 22 at East Terrace, Waterhouses.

Owing to financial restrictions, it was necessary for the Council to most reluctantly curtail the scheme of awarding 50% grants towards the cost of W.C. Conversions incurred by property owners

PRIVATE STREET WORKS

Negotiations have been completed and approvals received in respect of Private Street Works at Back Jubilee Street, New Brancepeth, and an early start will be made with this work.

Definite progress has also been made for similar works to be carried out to Back Streets in Langley Moor and Waterhouses, as part of the Council's programme in dealing with improvement of amenities in the area.

The following is a summary of the number of Houses, Shops and Business Premises, Licensed Premises and other Premises in your District :—

Dwelling Houses	6,121
Houses and Business Premises attached ...	133
Shops (separately rated)	96
Co-operative Stores	9
Licensed Premises	24
Workmen's Clubs and Institutes	11
Cinemas	6
Schools	12
Offices	12
Halls and Meeting Places	24
Radio Relay Undertakings	1
Refuse Tips	4
Sewage Works and Tanks	10
Cemeteries	3
Hospitals	1
Sporting Rights	3
Recreation Grounds	5
Hoardings	3
Water Pumping Station	1
Garages and other Temporary Erections ...	273
Crown Occupations	7
Public Utilities	7
Industrials	33
Colliery Water Supply	1
Open Cast Coal Disposal Centre	1
<hr/>	
Total	6,801
<hr/>	

PUBLIC CLEANSING

Your Sanitary Inspector is responsible for the administration and supervision of this department.

The collection and disposal of house and shop refuse is carried out by direct labour, as is also the collection, and baling of salvage.

There are 25 men employed in the department to carry out this work, and the details of their duties are shown belows :—

Depot Chargeman	1
District Chargemen	2
Driver Mechanic	1
Driver Fillers	6
Labourer Fillers	15
—			
Total	25
=			

A fleet of eight Karrier Refuse Collecting Vehicles is used for the collection and disposal of refuse and salvage, the particulars of which are shown in the following schedule.

	Year
Karrier Bantam JTN 27	1941
Karrier Bantam JTN 513	1942
Karrier Bantam JTN 798	1943
Karrier Bantam JVK 232	1945
Karrier Bantam JVK 557	1946
Karrier Bantam LTN 261	1947
Karrier C.K.3 MTN 471 (3 tonner)	1948
Karrier Bantam NVK 900	1950

The first three vehicles shown in the schedule have been in constant use for ten years or more, and have reached the stage when they are becoming a liability rather than an asset. The Council has, however, placed an order for a new Karrier Refuse Collecting Vehicle of 12 cu. yds. capacity, which I have no doubt will be operating on the district before the publication of this report. It has also been decided to dispense with one of these old 7 cu. yds. capacity vehicles.

With the gradual increase in the number of Council Houses, and the number of private properties having converted their sanitary arrangements from the conservancy to the water carriage system, it has been found possible during the year to arrange for two wagons, each with one driver, and four labourers, one of whom is a charge-man, to concentrate on the emptying of bins only. By doing this the work of clearing bins can be carried out more efficiently and economically. These two wagons, 10 cu. yds. and 7 cu. yds. are clearing 1,750 and 1,500 houses respectively each week, a total of 3,250.

As soon as it is possible a third wagon will be placed on similar work. In the meantime four of the 7 cu. yds. type of wagon with one Driver-filler and one Labourer-filler are engaged on districts which are served with both privies and bins.

There are approximately 6,100 houses and 400 other premises dealt with each week.

Bins are emptied every four to seven days according to requirements. Privies are cleared every seven days.

REFUSE DISPOSAL

Refuse is led to the Council tips at Brandon Colliery, Ushaw Moor and Esh Winning. Two other auxiliary tips are being used at Brandon Village and Burnigill Farm.

BRANDON VILLAGE REFUSE TIP

This is an old quarry which, apart from the fact that it is situated near to a block of 10 houses in the village, is an ideal tip. An arrangement has been made to cease tipping from May to October each year to prevent any annoyance to the occupants of these houses from "fly nuisance."

BURNIGILL TIP

This is a land reclamation scheme. Part of the field is low lying and boggy and the surface is being raised on an average of about 6 ft.

The use of these two tips will undoubtedly prolong the life of the Council's tip at Brandon Colliery.

Schedules 1 and 2 give details and costs of work done during the year.

Average Petrol Consumption (overall) 6.55 Miles per gallon.

SALVAGE

The following Schedule gives details of salvage collections and sales during the year.

The amount of salvaged paper sold during the year, shows a slight increase over 1951 sales, but prices declined to a considerable extent, as the following comparison of receipts for 1951 and 1952 will show.

1951 Average amount received for paper £15.89 per ton.

1952 Average amount received for paper £8.15 per ton.

	Weights			Receipts			Expenses

HOUSING IMPROVEMENTS

BRANCEPETH ESTATE

Almost all the farm houses, cottages and other dwellings, in the area, under the control of Brancepeth Estate, have been modernised. The improvements to the farm properties and cottages in Brandon Village include the installation of modern kitchen ranges with back boiler to ensure hot water supply, the provision of bathrooms and in many cases modern sanitation.

The dwelling houses in Middle and Office Street, Browney Colliery, have had the natural lighting and ventilation greatly improved by replacing the small sash windows with large casement type windows. Modern kitchen ranges with back boiler have also been installed, and a kitchen sink fitted in the back porch with hot and cold water supply.

A list of improved properties is shown below.

Farms and Cottages

Watergate Farm, Brandon Village.
 Brandon Hall Farm, Brandon Village.
 Red Barnes Farm, Meadowfield.
 Ash Tree Farm, Browney.
 Burnigill Farm and Cottages, Browney.
 Pringle House, New Brancepeth.

BRANDON VILLAGE

Nos. 47-52 (6 houses).
 Nos. 19-22 (4 houses).

BROWNEY COLLIERY

Office Street 143-157 (15 houses).
 Middle Street 91-103 (13 houses).

OTHER PROPERTIES

Primroseside Farm Cottages.
 Cock House Farm, Ushaw Moor.
 Broom Farm West, Broompark.

MEAT INSPECTION

Meat Inspection is carried out by the Council's Sanitary and Meat and Food Inspector at the Government controlled Slaughterhouse, Meadowfield, where cattle, sheep and pigs are slaughtered to supply the requirements of Durham City, Durham Rural and Brandon and Byshottles Districts.

As previously reported, the closest co-operation exists between the Council's Meat and Food Inspector and the Slaughterhouse Management, who give all possible assistance to facilitate inspection.

A Schedule giving details of carcasses inspected and the meat condemned is given below.

CARCASSES INSPECTED AND MEAT CONDEMNED

	Cattle ex Cows	Cows	Calves	Sheep	Pigs	Total
Carcasses inspected	3,436	455	72	12,575	1,912	18,450
All Diseases except T.B.						
Whole carcass ...	4	2		24	2	32
Weight of con- demned carcasses	lbs. 1,558	lbs. 550		lbs. 992	lbs. 440	lbs. 3,540
Carcasses of which some part or organ was condemned	1,657	75		117	8	1,857
Weight of con- demned parts or organs ...	lbs. 17,217	lbs. 941		lbs. 546	lbs. 60	lbs. 18,764
Percentage of car- casses and/or or- gans inspected af- fected with disease other than T.B.	48.34%	16.92%		1.12%	0.52%	10.23%

CARCASSES INSPECTED AND MEAT CONDEMNED—T.B.

	Cattle ex Cows	Cows	Calves	Sheep	Pigs	Total
Tuberculosis only :						
Whole carcasses condemned ...	7	12			7	26
Weight of con- demned carcasses	lbs. 2,908	lbs. 4,446			lbs. 924	lbs. 8,278
Carcasses of which some part or or- gan was con- demned ...	576	143			1	720
Weight of con- demned parts or organs ...	lbs. 6,963	lbs. 2,183			lbs. 16	lbs. 9,162
Percentage of No. affected with T.B.	15.01%	34.06%			0.41%	4.04%

Licences to Slaughter Animals

Eighteen Slaughtermen's Licences were issued during the year.

FOOD INSPECTION

1,344 lbs. of foodstuffs condemned during the year consisted chiefly of:—

Canned Cooked Meats, Imported.

Canned Fruit and Vegetables.

Bacon.

Sausage, Margarine, Butter and Cheese.

ICE CREAM

Three of the eight Ice Cream Manufacturers on the Council's Register, have decided to buy in their Ice Cream from the larger manufacturers, as the comparatively small amount of Ice Cream they were making did not justify the purchase of expensive plant necessary to comply with the Ice Cream Regulations.

The number of manufacturers registered in the area is now five, and 29 shops, etc., are registered as retailers.

These premises are regularly visited and the standard of cleanliness and, in the case of manufacturers, methods of production, have been found satisfactory.

FISH FRYERS

The premises occupied by Fish Fryers have been visited regularly during the year and the conditions as regards cleanliness and general management have been found satisfactory.

The following table shows the disposition of these premises in Wards.

Ward				District				No. of Premises	
CENTRE	Brandon Colliery	3	
EAST	Langley Moor	3	
SOUTH	Meadowfield	1	
				Browney	2	
NORTH	New Brancepeth	2	
BROOM	Broompark	1	
USHAW	Ushaw Moor	3	
WEST	Esh Winning	3	
				Waterhouses	1	
				TOTAL				...	19

BAKEHOUSES

There are nine bakehouses in the area, two of which are wholesalers and retailers, and the remainder are in the retail trade only.

The satisfactory standard of cleanliness of these premises has been maintained.

MILK SUPPLIES

All milk sold to the general public in the district is pasteurised and bottled at the Creamery of the Milk Marketing Board, Langley Moor, or by the various dairies in outlying districts who supply pasteurised milk through Co-operative Societies.

The following is a summary of the main facts concerning the milk supply in your district.

Producer Retailers Tuberculin Tested Pasteurised	4
Producer Retailers Pasteurised	2
Retailers Tuberculin Tested Pasteurised	6
Retailers Pasteurised	6
Retailers Sterilised	2
Retailers Tuberculin Tested	2
Total			22

Of the above one Producer Retailer (Tuberculin Tested, Pasteurised), one Producer Retailer (Pasteurised), 2 Retailers (Tuberculin Tested, Pasteurised), 3 Retailers (Pasteurised) and one Retailer (Sterilised) are non-resident in the area.

CREAMERY, MILK MARKETING BOARD, STONE BRIDGE, LANGLEY MOOR

This Creamery, built by the Milk Marketing Board, was opened on 14th April, 1948, and all dairy farmers taking part in the Scheme have their milk collected daily for pasteurisation and bottling. Those who retail milk have the required quantity returned to them daily.

The Creamery situated at Stone Bridge, is built on an island of land bounded on the North Side by the main arterial road (Durham to Crook) and by the old road on the South side.

The through put of the Creamery has gradually risen from 42,000 gallons weekly to approximately 120,000 gallons, of which some 40,000 gallons are tuberculin tested pasteurised.

This Creamery, its buildings, lay out and equipment is regarded by the leading Authorities in the Trade, as the best and most up-to-date pasteurising and bottling dairy in the country.

FACTORIES ACT, 1937 and 1948

Part 1 of the Act

1. Inspections for purposes of provisions as to health (including inspections made by Sanitary Inspector.)

Wearing, apparel Making, etc., cleaning and washing ...	3	—	—	—	—	—
TOTAL ...	3	—	—	—	—	—

RODENT CONTROL

The supervision and administration of Rodent Control is carried out by your Sanitary Inspector.

Mr. S. Slack, who is depot chageman in the Cleansing Department, also acts as part-time rodent operator, and during the periods when sewer treatment is undertaken (twice yearly), two other men are transferred to this work, for a period of approximately four weeks.

Rodent Control was taken over from the Durham County Council during 1946, and since that date sewer treatment had been successfully carried out every six months, usually during the months of April and September.

When business premises are disinfested, a charge is made, comprising actual cost of labour and materials, plus a percentage for administration expenses, private dwellings are treated free of charge.

The undermentioned schedule shows in detail the work over the past seven years, and it is pleasing to note that the sewer infestation is gradually decreasing.
